

## Privacy Law 2018

In The Netherlands the European “General Data Protection Regulation” (GDPR) law will be enforced at May 25th 2018.

It is about the export of personal data outside the EU and storage of your personal data

## Privacy Statement

Baars Anode uses customer data only within our own organisation. Customer data is not shared with other companies and is stored on our private company server. Our private company server runs at high security level.

## Cookies and (tracking) scripts

Our website only tracks visitors for standard e-commerce purposes. Cookies are used for the webshop.

## Secured https web connection

On our website uses a certified SSL certificate from ...

## Online Data Storage

Our website server stores session and webshop data. Amazon, IcePay and deSplenter.nl (WooCommerce webshop module) might store data as email and sale logs.

## Offline Data Storage

Baars Anode stores customer data (name, address, zipcode, city, country, email address, telephone, website, bank account and bank transactions) for procurement, quotations, invoices and accounting/bookkeeping.

## Permission

Baars Anode does not ask customers, suppliers, website and email users for permission to use their personnel data, because we only use minimal necessary data for our company. (See Dutch AP statement).

### Soms heeft u toestemming nodig

Let op dat u geen persoonsgegevens verwerkt die niet noodzakelijk zijn voor de uitvoering daarvan. Doet u dat wel? Dan moet u daarvoor rechtsgeldige toestemming of een andere grondslag hebben.

Voorbeeld: als u online een product verkoopt, moet u adresgegevens verwerken om het product bij iemand te kunnen bezorgen. Wilt u de persoonsgegevens daarnaast ook nog gebruiken om het koopgedrag van iemand te analyseren? Dan moet u hiervoor rechtsgeldige toestemming hebben van de betrokken persoon.

## Personal data or delete request

According to this European GDPR law everybody can request for what personal is stored and even request deletion. We are very happy to help you with that request, but we charge you 100 Euro in advance for this request.

A delete request is also possible, but Baars Anode is not allowed to delete recent bank transactions and accounting/bookkeeping data because the Dutch tax office demands 7 years of storage.
